

Publications of Donald G. Truhlar

Chapters

C1. “Electron-Impact Spectroscopy: Vibrational–Rotational Excitation,” S. Trajmar, J. K. Rice, A. Kuppermann, and D. G. Truhlar, in *Advances in Chemical Physics*, Vol. 18, edited by I. Prigogine and S. A. Rice (John Wiley and Sons, New York, 1970), pp 70–83.

C2. “Algebraic Variational Methods in Scattering Theory,” D. G. Truhlar, J. Abdallah, Jr., and R. L. Smith, in *Advances in Chemical Physics*, Vol. 25, edited by I. Prigogine and S. A. Rice (John Wiley and Sons, New York, 1974), pp 211–293.

C3. “Time-Reversal Invariance, Representations for Scattering Wave Functions, Symmetry of the Scattering Matrix, and Differential Cross Sections,” D. G. Truhlar, C. A. Mead, and M. A. Brandt, in *Advances in Chemical Physics*, Vol. 33, edited by I. Prigogine and S. A. Rice (John Wiley and Sons, New York, 1975), pp 296–344.

C4. “Electron Scattering,” D. G. Truhlar, in *Semiempirical Methods of Electronic Structure Calculations, Part B: Applications*, edited by G. A. Segal (Plenum Press, New York, 1977), pp 247–288. [*Mod. Theor. Chem.* 8, 247–288 (1977).]

C5. “History of H₃ Kinetics,” D. G. Truhlar and R. E. Wyatt, in *Annual Review of Physical Chemistry*, Vol. 27, edited by B. S. Rabinovitch (Annual Reviews, Inc., Palo Alto, CA, 1976), pp 1–43.

C6. “H + H₂: Potential Energy Surfaces and Elastic and Inelastic Scattering,” D. G. Truhlar and R. E. Wyatt, in *Advances in Chemical Physics*, Vol. 36, edited by I. Prigogine and S. A. Rice (John Wiley and Sons, New York, 1977), pp 141–204.

C7. “Monte Carlo Trajectory Study of Ar + H₂ Collisions. Translation to Vibration Energy Transfer from Different Initial States,” N. C. Blais and D. G. Truhlar, in *State-to-State Chemistry*, edited by P. R. Brooks and E. F. Hayes (*ACS Symp. Ser.* Volume 56, Washington, D.C., 1977), pp 243–246.

C8. “Reactive Scattering Cross Sections: Quasiclassical and Semiclassical Methods,” D. G. Truhlar and J. T. Muckerman, in *Atom-Molecule Collision Theory: A Guide for the Experimentalist*, edited by R. B. Bernstein (Plenum Press, New York, 1979), pp 505–566.

C9. “Direct-Mode Chemical Reactions: Classical Theories,” D. G. Truhlar and D. A. Dixon, in *Atom-Molecule Collision Theory: A Guide for the Experimentalist*, edited by R. B. Bernstein (Plenum Press, New York, 1979), pp 595–646.

C10. “Polarization Potentials for Electron Scattering,” D. G. Truhlar, D. A. Dixon, R. A. Eades, F. A. Van-Catledge, and K. Onda, in *Electron–Molecule and Photon–Molecule Collisions*, edited by T. N. Rescigno, V. McKoy, and B. I. Schneider (Plenum Press, New York, 1979), pp 151–165.

C11. “Applications of Close Coupling Algorithms to Electron-Atom, Electron–Molecule, and Atom-Molecule Scattering,” D. G. Truhlar, N. M. Harvey, K. Onda, and M. A. Brandt, in *Algorithms and Computer Codes for Atomic and Molecular Quantum Scattering Theory*, Vol. 1, edited by L. Thomas (National Resource for Computation in Chemistry, Lawrence Berkeley Laboratory, Berkeley, CA, 1979), pp 220–289.

C12. “The Coupling of Electronically Adiabatic States in Atomic and Molecular Collisions,” B. C. Garrett and D. G. Truhlar, in *Theoretical Chemistry: Advances and Perspectives*, Vol. 6A, edited by D. Henderson (Academic Press, New York,

1981), pp 215–289. [*Theor. Chem.* (New York) 6A (“Theory of Scattering: Papers in Honor of Henry Eyring”), 215–289 (1981).]

C13. “Introduction,” P. Politzer and D. G. Truhlar, in *Chemical Applications of Atomic and Molecular Electrostatic Potentials*, edited by P. Politzer and D. G. Truhlar (Plenum Press, New York, 1981), pp 1–6.

C14. “Some Relationships Between Different Uses of the Electrostatic Potential,” D. G. Truhlar, *ibid.*, pp 85–91.

C15. “Effective Potentials for Intermediate-Energy Electron Scattering: Testing Theoretical Models,” D. G. Truhlar, *ibid.*, pp 123–172.

C16. “Adiabatic Polarization Potentials for the Water and Nitrogen Molecules. A Comparison of Large and Small Basis Sets,” C. H. Douglass, Jr., D. A. Weil, P. A. Charlier, R. A. Eades, D. G. Truhlar, and D. A. Dixon, *ibid.*, pp 173–213.

C17. “Reaction, Dissociation, and Energy Transfer as a Function of Initial State for H + H₂ on an Accurate Ab Initio Potential Energy Surface,” N. C. Blais and D. G. Truhlar, in *Potential Energy Surfaces and Dynamics Calculations*, edited by D. G. Truhlar (Plenum Press, New York, 1981), pp 431–473.

C18. “Determination of the Bottleneck Regions of Potential Energy Surfaces for Atom Transfer Reactions by Variational Transition State Theory,” B. C. Garrett, D. G. Truhlar, and R. S. Grev, *ibid.*, pp 587–637.

C19. “Derivative Coupling Elements in Electronically Adiabatic Representations and Their Use in Scattering Calculations,” B. C. Garrett, D. G. Truhlar, and C. F. Melius, in *Energy Storage and Redistribution in Molecules*, edited by J. Hinze (Plenum Press, New York, 1983), pp 375–395.

C20. “Generalized Transition State Theory,” D. G. Truhlar, A. D. Isaacson, and B. C. Garrett, in *Theory of Chemical Reaction Dynamics*, edited by M. Baer (CRC Press, Boca Raton, FL, 1985), Vol. 4, pp 65–137.

C21. “Variational Transition State Theory,” D. G. Truhlar and B. C. Garrett, in *Annual Review of Physical Chemistry*, Vol. 35, edited by B. S. Rabinovitch, J. M. Schurr, and H. L. Strauss (Annual Reviews, Inc., Palo Alto, CA, 1984), pp 159–189.

C22. “Variational Transition State Theory and Tunneling Calculations of Potential Energy Surface Effects on the Reaction of O(³P) with H₂,” D. G. Truhlar, K. Runge, and B. C. Garrett, in *Twentieth Symposium (International) on Combustion* (Combustion Institute, Pittsburgh, PA, 1984), pp 585–593.

C23. “Adiabatic and Nonadiabatic Methods for Energies, Lifetimes, and Branching Probabilities of Bimolecular Reactive Collisions,” B. C. Garrett, D. W. Schwenke, R. T. Skodje, D. Thirumalai, T. C. Thompson, and D. G. Truhlar, in *Resonances in Electron–Molecule Scattering, van der Waals Complexes, and Reactive Chemical Dynamics*, edited by D. G. Truhlar (*ACS Symp. Ser.* Volume 263, Washington, D.C., 1984), pp 375–400.

C24. “Transition State Theory,” M. M. Kreevoy and D. G. Truhlar, in *Investigation of Rates and Mechanisms of Reactions*, fourth ed., edited by C. F. Bernasconi (John Wiley and Sons, New York, 1986), Part 1, pp 13–95. [*Tech. Chem.* (New York), fourth ed., 6/Pt. 1, 13–95 (1986).]

C25. "Dynamics Calculations Based on Ab Initio Potential Energy Surfaces," D. G. Truhlar, F. B. Brown, D. W. Schwenke, R. Steckler, and B. C. Garrett, in *Comparison of Ab Initio Quantum Chemistry with Experiment for Small Molecules*, edited by R. J. Bartlett (Reidel, Dordrecht, Holland, 1985), pp 95–139.

C26. "Large-Scale Quantum Mechanical Scattering Calculations on Vector Computers," D. W. Schwenke and D. G. Truhlar, in *Supercomputer Applications*, edited by R. W. Numrich (Plenum Press, New York, 1985), pp 215–254.

C27. "Potential Energy Surfaces," D. G. Truhlar, in *The Encyclopedia of Physical Science and Technology*, edited by R. A. Meyers (Academic Press, New York, 1987), Vol. 11, pp 206–214. Updates: second ed. (1992), Vol. 13, pp 385–393; third ed. (2001), Vol. 13, pp 9–17.

C28. "Converged Calculations of Rotational Excitation and V–V Energy Transfer in the Collision of Two Molecules," D. W. Schwenke and D. G. Truhlar, in *Supercomputer Simulations in Chemistry*, edited by M. Dupuis (Springer-Verlag, Berlin, 1986), pp 165–197. [*Lect. Notes Chem.* **44**, 165–197 (1986).]

C29. "The Representation and Use of Potential Energy Surfaces in the Wide Vicinity of a Reaction Path for Dynamics Calculations on Polyatomic Reactions," D. G. Truhlar, F. B. Brown, R. Steckler, and A. D. Isaacson, in *The Theory of Chemical Reaction Dynamics*, edited by D. C. Clary (D. Reidel, Dordrecht, Holland, 1986), pp 285–329. [*NATO ASI Ser., Ser. C* **170**, 285–329 (1986).]

C30. "Supercomputer Research in Chemistry and Chemical Engineering: An Introduction," K. F. Jensen and D. G. Truhlar, in *Supercomputer Research in Chemistry and Chemical Engineering*, edited by K. F. Jensen and D. G. Truhlar (*ACS Symp. Ser.* Volume 353, Washington, D.C., 1987), pp 1–14.

C31. "Large-Scale Quantum Mechanical Calculations of the Sensitivity of Vibrational and Rotational Energy Transfer to the Potential Energy Surface in the Collision of Two Molecules," D. W. Schwenke and D. G. Truhlar, *ibid.*, pp 176–199.

C32. "Chemical Reaction Rate Calculations Using a Cray-2 Computer and Their Use to Test Approximate Theories," K. Haug, D. W. Schwenke, Y. Shima, D. G. Truhlar, J. Z. H. Zhang, Y. Zhang, Y. Sun, D. J. Kouri, and B. C. Garrett, in *Science and Engineering on Cray Supercomputers* (Proceedings of the Third International Symposium, Minneapolis, MN, Sept. 1987; Cray Research, Minneapolis, MN, 1987), pp 427–447.

C33. "New Time-Dependent and Time-Independent Computational Methods for Molecular Collisions," D. J. Kouri, Y. Sun, R. C. Mowrey, J. Z. H. Zhang, D. G. Truhlar, K. Haug, and D. W. Schwenke, in *Mathematical Frontiers in Computational Chemical Physics*, edited by D. G. Truhlar (Springer-Verlag, New York, 1988), pp 207–244.

C34. "Dynamical Formulation of Transition State Theory: Variational Transition States and Semiclassical Tunneling," S. C. Tucker and D. G. Truhlar, in *New Theoretical Concepts for Understanding Organic Reactions*, edited by J. Bertrán and I. G. Csizmadia (Kluwer, Dordrecht, The Netherlands, 1989), pp 291–346. [*NATO ASI Ser., Ser. C* **267**, 291–346 (1989).]

C35. "Computational Strategies and Improvements in the Linear Algebraic Variational Approach to Rearrangement Scattering," D. W. Schwenke, M. Mladenovic, M. Zhao, D. G. Truhlar, Y. Sun, and D. J. Kouri, in *Supercomputer Algorithms for Reactivity, Dynamics, and Kinetics of Small Molecules*, edited by A. Laganà (Kluwer, Dordrecht, The Netherlands, 1989), pp 131–168. [*NATO ASI Ser., Ser. C* **277**, 131–168 (1989).]

C36. "The HF Dimer: Potential Energy Surface and Dynamical Processes," D. G. Truhlar, in *Dynamics of Polyatomic van der Waals Complexes*, edited by N. Halberstadt and K. C. Janda (Plenum, New York, 1990), pp 159–185. [*NATO ASI Ser., Ser. B* **227**, 159–185 (1990).]

C37. "Localized Basis Functions and Other Computational Improvements in Variational Nonorthogonal Basis Function Methods for Quantum Mechanical Scattering Problems Involving Chemical Reactions," D. W. Schwenke and D. G. Truhlar, in *Computing Methods in Applied Sciences and Engineering*, edited by R. Glowinski and A. Lichnewsky (Society for Industrial and Applied Mathematics, Philadelphia, PA, 1990), pp 291–310.

C38. "RMPROP: A Computer Program for Quantum Mechanical Close Coupling Calculations for Inelastic Collisions," M. J. Unekis, D. W. Schwenke, N. M. Harvey, and D. G. Truhlar, in *Modern Techniques in Computational Chemistry: MOTECC-91*, edited by E. Clementi (ESCOM, Leiden, 1991), pp 749–772. [*Mod. Tech. Comput. Chem.: MOTECC-91*, 749–72 (1991).]

C39. "Variational Transition State Theory with Multidimensional Semiclassical Ground-State Transmission Coefficients: Applications to Secondary Deuterium Kinetic Isotope Effects in Reactions Involving Methane and Chloromethane," D. G. Truhlar, D.-h. Lu, S. C. Tucker, X. G. Zhao, A. González-Lafont, T. N. Truong, D. Maurice, Y.-P. Liu, and G. C. Lynch, in *Isotope Effects in Chemical Reactions and Photodissociation Processes*, by J. A. Kaye (*ACS Symp. Ser.* 502, Washington, D.C., 1992), pp 16–36.

C40. "Linear Algebraic Formulation of Reactive Scattering with General Basis Functions," G. J. Tawa, S. L. Mielke, D. G. Truhlar, and D. W. Schwenke, in *Advances in Molecular Vibrations and Collision Dynamics*, Vol. 2B, edited by J. M. Bowman (JAI Press, Greenwich, CT, 1994), pp 45–116. [*Adv. Mol. Vib. Collision Dyn.* **2B**, 45–116 (1994).]

C41. "RMPROP—Version 2: A Computer Program for Quantum Mechanical Close Coupling Calculations for Inelastic Collisions," M. J. Unekis, D. W. Schwenke, N. M. Harvey, and D. G. Truhlar, in *Methods and Techniques in Computational Chemistry: METECC-94*, edited by E. Clementi (STEF, Cagliari, Italy, 1993), Vol. C, pp 1–46.

C42. "Continuum Solvation Models: Classical and Quantum Mechanical Implementations," C. J. Cramer and D. G. Truhlar, in *Reviews in Computational Chemistry*, Vol. 6, edited by K. B. Lipkowitz and D. B. Boyd (VCH Publishers, New York, 1995), pp 1–72.

C43. "Development and Biological Applications of Quantum Mechanical Continuum Solvation Models," C. J. Cramer and D. G. Truhlar, in *Quantitative Treatments of Solute/Solvent Interactions*, edited by P. Politzer and J. S. Murray (Elsevier, Amsterdam, 1994), pp 9–54. [*Theor. Comp. Chem.* **2**, 9–54 (1994).]

C44. "Large-Scale Calculations of the Quantum Dynamics of Molecular Collisions and Reactions," D. G. Truhlar, D. W. Schwenke, S. L. Mielke, M. S. Reeves, R. W. Numrich, D. H. Briesemeister, D. C. Chatfield, R. S. Friedman, M. Kalke, G. J. Tawa, and M. J. Unekis, in *Toward Teraflop Computing and New Grand Challenge Applications*, edited by R. K. Kalia and P. Vashishta (Nova Science Publishers, Commack, NY, 1995), pp 151–171.

C45. "Theoretical Approaches to the Reaction Dynamics of Clusters," A. González-Lafont and D. G. Truhlar, in *Chemical Reactions in Clusters*, edited by E. R. Bernstein (Oxford University Press, New York, 1996), pp 1–39.

- C46. "Reaction Path Approach to Dynamics at a Gas-Solid Interface: Quantum Tunneling Effects for an Adatom on a Non-Rigid Metallic Surface," S. E. Wonchoba, W.-P. Hu, and D. G. Truhlar, in *Theoretical and Computational Approaches to Interface Phenomena*, edited by H. L. Sellers and J. T. Golab (Plenum, New York, 1994), pp 1-33.
- C47. "Structure and Reactivity in Aqueous Solutions: An Overview," C. J. Cramer and D. G. Truhlar, in *Structure and Reactivity in Aqueous Solution: Characterization of Chemical and Biological Systems*, edited by C. J. Cramer and D. G. Truhlar (*ACS Symp. Ser.* 568, Washington, D.C., 1994), pp 1-9.
- C48. "Solvation Modeling in Aqueous and Nonaqueous Solvents: New Techniques and a Re-examination of the Claisen Rearrangement," J. W. Storer, D. J. Giesen, G. D. Hawkins, G. C. Lynch, C. J. Cramer, D. G. Truhlar, and D. A. Liotard, *ibid.*, pp 24-49.
- C49. "Think Globally, Act Locally: An Introduction to Domain-Based Parallelism and Problem Decomposition Methods," D. E. Keyes, Y. Saad, and D. G. Truhlar, in *Domain-Based Parallelism and Problem Decomposition Methods in Computational Science and Engineering*, edited by D. Keyes, Y. Saad, and D. G. Truhlar (Society for Industrial and Applied Mathematics, Philadelphia, PA, 1995), pp vii-xiv.
- C50. "Problem Decomposition Techniques in Quantum Mechanical Reactive Scattering," D. W. Schwenke and D. G. Truhlar, *ibid.*, pp 303-323.
- C51. "Direct Dynamics Method for the Calculation of Reaction Rates," D. G. Truhlar, in *The Reaction Path in Chemistry: Current Approaches and Perspectives*, edited by D. Heidrich (Kluwer, Dordrecht, The Netherlands, 1995), pp 229-255. [*Understanding Chem. React.* **16**, 229-255 (1995).]
- C52. "Continuum Solvation Models," C. J. Cramer and D. G. Truhlar, in *Solvent Effects and Chemical Reactivity*, edited by O. Tapia and J. Bertrán (Kluwer, Dordrecht, The Netherlands, 1996), pp 1-80. [*Understanding Chem. React.* **17**, 1-80 (1996).]
- C53. "Computational Spectroscopy of the Transition State," D. C. Chatfield, R. S. Friedman, S. L. Mielke, G. C. Lynch, T. C. Allison, D. G. Truhlar, and D. W. Schwenke, in *Dynamics of Molecules and Chemical Reactions*, edited by R. E. Wyatt and J. Z. H. Zhang (Marcel Dekker, New York, 1996), pp 323-386.
- C54. "Die Photochemischen Bildung des Chlorwasserstoffs. Dynamics of $\text{Cl} + \text{H}_2 \leftrightarrow \text{HCl} + \text{H}$ on a New Potential Energy Surface: The Photosynthesis of Hydrogen Chloride Revisited 100 Years after Max Bodenstein," T. C. Allison, S. L. Mielke, D. W. Schwenke, G. C. Lynch, M. S. Gordon, and D. G. Truhlar, in *Gas-Phase Chemical Reaction Systems: Experiments and Models 100 Years after Max Bodenstein*, edited by J. Wolfrum, H.-R. Volpp, R. Rannacher, J. Warnatz (Springer, Berlin, 1996), pp 111-124. [*Springer Ser. Chem. Phys.* **61**, 111-124 (1996), Volume Date 1995.]
- C55. "Barrier Resonances and Chemical Reactivity," R. S. Friedman and D. G. Truhlar, in *Multiparticle Quantum Scattering with Applications to Nuclear, Atomic, and Molecular Physics*, edited by D. G. Truhlar and B. Simon (Springer, New York, 1997), pp 243-281. [*IMA Vol. Math. Its Appl.* **89**, 243-281 (1997).]
- C56. "Modeling Free Energies of Solvation and Transfer," D. J. Giesen, C. C. Chambers, G. D. Hawkins, C. J. Cramer, and D. G. Truhlar, in *Computational Thermochemistry*, edited by K. Irikura and D. J. Frurip (*ACS Symp. Ser.* Volume 677, Washington, D.C., 1998), pp 285-300 (1998).
- C57. "Theoretical Chemistry," D. G. Truhlar, in *Macmillan Encyclopedia of Chemistry*, edited by J. J. Lagowski (Simon & Schuster Macmillan, New York, 1997), pp 1432-1433 (in Vol. 4). New edition: updated version, 2002.
- C58. "Transition State Theory," B. C. Garrett and D. G. Truhlar, in *Encyclopedia of Computational Chemistry*, edited by P. v. R. Schleyer, N. L. Allinger, T. Clark, J. Gasteiger, P. A. Kollman, and H. F. Schaefer III (John Wiley & Sons, Chichester, U.K., 1998), Volume 5, pp 3094-3104.
- C59. "Testing the Accuracy of Practical Semiclassical Methods: Variational Transition State Theory with Optimized Multidimensional Tunneling," T. C. Allison and D. G. Truhlar, in *Modern Methods for Multidimensional Dynamics Computations in Chemistry*, edited by D. L. Thompson (World Scientific, Singapore, 1998), pp 618-712.
- C60. "Modeling the Effect of Solvation on Structure, Reactivity, and Partitioning of Organic Solutes: Utility in Drug Design," C. C. Chambers, D. J. Giesen, G. D. Hawkins, W. H. J. Vaes, C. J. Cramer, and D. G. Truhlar, in *Rational Drug Design*, edited by D. G. Truhlar, W. J. Howe, A. J. Hopfinger, J. M. Blaney, and R. A. Dammkoehler (Springer, New York, 1999), pp 51-72. [*IMA Vol. Math. Its Appl.* **108**, 51-72 (1999).]
- C61. "New Tools for Rational Drug Design," G. D. Hawkins, J. Li, T. Zhu, C. C. Chambers, D. J. Giesen, D. A. Liotard, C. J. Cramer, and D. G. Truhlar, in *Rational Drug Design: Novel Methodology and Practical Applications*, edited by A. L. Parrill and M. R. Reddy (*ACS Symp. Ser.* Volume 719, Washington, D.C., 1999), pp 121-140.
- C62. "Universal Solvation Models," G. D. Hawkins, T. Zhu, J. Li, C. C. Chambers, D. J. Giesen, D. A. Liotard, C. J. Cramer, and D. G. Truhlar, in *Combined Quantum Mechanical and Molecular Mechanical Methods*, edited by J. Gao and M. A. Thompson (*ACS Symp. Ser.* Volume 712, Washington, D.C., 1998), pp 201-219.
- C63. "Dual-Level Methods for Electronic Structure Calculations of Potential Energy Functions that Use Quantum Mechanics as the Lower Level," J. C. Corchado and D. G. Truhlar, *ibid.*, pp 106-127.
- C64. "Quantum Catalysis: The Modeling of Catalytic Transition States," M. B. Hall, P. Margl, G. Náray-Szabó, V. L. Schramm, D. G. Truhlar, R. A. van Santen, A. Warshel, and J. L. Whitten, in *Transition State Modeling for Catalysis*, edited by D. G. Truhlar and K. Morokuma (*ACS Symp. Ser.* Volume 721, Washington, D.C., 1999), pp 2-17.
- C65. "Ethylene Polymerization by Zirconocene Catalysis," P. K. Das, D. W. Dockter, D. R. Fahey, D. E. Lauffer, G. D. Hawkins, J. Li, T. Zhu, C. J. Cramer, D. G. Truhlar, S. Dapprich, R. D. J. Froese, M. C. Holthausen, Z. Liu, K. Mogi, S. Vyboishchikov, D. G. Musaev, and K. Morokuma, *ibid.*, pp 208-224.
- C66. "Solvation Thermodynamics and the Treatment of Equilibrium and Nonequilibrium Solvation Effects by Models Based on Collective Solvent Coordinates," C. J. Cramer and D. G. Truhlar, in *Free Energy Calculations in Rational Drug Design*, edited by M. R. Reddy and M. D. Erion (Kluwer Academic/Plenum, New York, 2001), pp 63-95.
- C67. "Molecular-Scale Modeling of Reactions and Solvation," D. G. Truhlar, in *First International Conference on Foundations of Molecular Modeling and Simulation*; edited by P. T. Cummings, P. R. Westmoreland, and B. Carnahan (*AICChE Symp. Ser.* Vol. 97, New York, 2001), pp 71-83. [*AICChE Symp. Ser.* (2001), 325 (Foundations of Molecular Modeling and Simulation), pp 71-83.]

C68. "Quantum Mechanical Methods for Enzyme Kinetics," J. Gao and D. G. Truhlar, in *Annual Review of Physical Chemistry*, Vol. 53, edited by S. R. Leone, P. Alivisatos, and A. E. McDermott (Annual Reviews, Inc., Palo Alto, CA, 2002), pp 467–505.

C69. "Non-Born–Oppenheimer Chemistry: Potential Surfaces, Couplings, and Dynamics," A. W. Jasper, B. K. Kendrick, C. A. Mead, and D. G. Truhlar, in *Modern Trends in Chemical Reaction Dynamics: Experiment and Theory (Part 1)*, edited by X. Yang and K. Liu (World Scientific, Singapore, 2004), pp 329–391. [*Adv. Ser. Phys. Chem.* **14**, 329–391 (2004).]

C70. "Multilevel Methods for Thermochemistry and Thermochemical Kinetics," B. J. Lynch and D. G. Truhlar, in *Recent Advances in Electron Correlation Methodology*, edited by A. K. Wilson and K. A. Peterson (*ACS Symp. Ser.*, Oxford University Press, Washington, D.C., 2005), in press.

C71. "Variational Transition State Theory and Multidimensional Tunneling for Simple and Complex Reactions in the Gas Phase, Solids, Liquids, and Enzymes," D. G. Truhlar, in *Isotope Effects in Chemistry and Biology*, edited by A. Kohen and H. H. Limbach (Taylor & Francis, CRC Press: New York, 2005), pp 579–620.

C72. "Hydrogen Atom Transfers in B₁₂ Enzymes," R. Banerjee, D. G. Truhlar, A. Dybala-Defratyka, P. Paneth, in *Biological Aspects of Hydrogen Transfer*, edited by R. Schowen and J. Klinman; Vol. 2 of *Handbook of Hydrogen Transfer*, edited by R. L. Schowen (Wiley-VCH, Weinheim, Germany, 2005), in press.

C73. "Variational Transition State Theory in the Treatment of Hydrogen Transfer Reactions," B. C. Garrett and D. G. Truhlar, in *Physical and Chemical Aspects of Hydrogen Transfer*, edited by J. T. Hynes and H. H. Limbach; Vol. 1 of *Handbook of Hydrogen Transfer*, edited by R. L. Schowen (Wiley-VCH, Weinheim, Germany, 2005), in press.

C74. "Decoherence in Combined Quantum Mechanical and Classical Mechanical Methods for Dynamics as Illustrated for Non-Born–Oppenheimer Trajectories," D. G. Truhlar, in *Quantum Dynamics of Complex Molecular Systems*, edited by D. A. Micha and I. Burghardt (Chemical Physics Series of Springer-Verlag), in press.

Chemical Reaction Dynamics and Photochemistry

2. "Application of the Statistical Phase-Space Theory to Reactions of Atomic Hydrogen with Deuterium Halides," D. G. Truhlar and A. Kuppermann, *J. Phys. Chem.* **73**, 1722–1734 (1969).

3. "Statistical Phase-Space Theory of the Reaction C⁺ + D₂, Including Threshold Behavior," D. G. Truhlar, *J. Chem. Phys.* **51**, 4617–4623 (1969).

5. "Quantum Mechanics of the H + H₂ Reaction: Exact Scattering Probabilities for Collinear Collisions," D. G. Truhlar and A. Kuppermann, *J. Chem. Phys.* **52**, 3841–3843 (1970).

9. "The Adiabatic Theory of Chemical Reactions," D. G. Truhlar, *J. Chem. Phys.* **53**, 2041–2044 (1970).

10. "Application of the Statistical Phase Space Theory to the Reaction K + HCl → KCl + H and to Inelastic Scattering," D. G. Truhlar, *J. Chem. Phys.* **54**, 2635–2641 (1971).

11. "Exact Tunneling Calculations," D. G. Truhlar and A. Kuppermann, *J. Am. Chem. Soc.* **93**, 1840–1851 (1971).

13. "A Test of Transition State Theory Against Exact Quantum Mechanical Calculations," D. G. Truhlar and A. Kuppermann, *Chem. Phys. Lett.* **9**, 269–272 (1971).

15. "Potential Energy Surfaces for Atom Transfer Reactions Involving Hydrogens and Halogens," C. A. Parr and D. G. Truhlar, *J. Phys. Chem.* **75**, 1844–1860 (1971).

18. "Enhancement of the Reaction Cross Section of He + H₂⁺ → HeH⁺ + H by Vibrational Excitation of H₂⁺ According to the Statistical Phase-Space Theory," D. G. Truhlar, *J. Chem. Phys.* **56**, 1481–1486 (1972).

20. "Exact and Approximate Quantum Mechanical Reaction Probabilities and Rate Constants for the Collinear H + H₂ Reaction," D. G. Truhlar and A. Kuppermann, *J. Chem. Phys.* **56**, 2232–2252 (1972).

701. "Multi-Coefficient Extrapolated Density Functional Theory for Thermochemistry and Thermochemical Kinetics," Y. Zhao, B. J. Lynch, and D. G. Truhlar, *Phys. Chem. Chem. Phys.* **7**, 43–52 (2005).
702. "Benchmark Calculations of Reaction Energies, Barrier Heights, and Transition State Geometries for Hydrogen Abstraction from Methanol by a Hydrogen Atom," J. Pu and D. G. Truhlar, *J. Phys. Chem. A* **109**, 773–778 (2005).
703. "Benchmark Database of Barrier Heights for Heavy Atom Transfer, Nucleophilic Substitution, Association, and Unimolecular Reactions and Its Use to Test Theoretical Methods," Y. Zhao, N. González-García, and D. G. Truhlar, *J. Phys. Chem. A* **109**, 2012–2018 (2005).
704. "Quantum Mechanical Reaction Rate Constants by Vibrational Configuration Interaction. Application to the OH + H₂ → H₂O + H Reaction as a Function of Temperature," A. Chakraborty and D. G. Truhlar, *Proc. Natl. Acad. Sci. U.S.A.*, **102**, 6744–6749 (2005). (Special Feature issue on Chem. Theory Comp.)
706. "Temperature Dependence of Carbon-13 Kinetic Isotope Effects of Importance to Global Climate Change," H. Lin, Y. Zhao, B. A. Ellingson, J. Pu, and D. G. Truhlar, *J. Am. Chem. Soc.* **127**, 2830–2831 (2005).
710. "Small Temperature Dependence of the Kinetic Isotope Effect for the Hydride Transfer Reaction Catalyzed by *Escherichia coli*, Dihydrofolate Reductase," J. Pu, S. Ma, J. Gao, and D. G. Truhlar, *J. Phys. Chem. B* **109**, 8551–8556 (2005).
711. "Dependence of Transition State Structure on Substrate: The Intrinsic C-13 Kinetic Isotope Effect is Different for Physiological and Slow Substrate of the Ornithine Decarboxylase Reaction Because of Different Hydrogen Bonding Structures," D. Sicinska, D. G. Truhlar, and P. Paneth, *J. Am. Chem. Soc.* **127**, 5414–5422 (2005).
714. "Non-Born–Oppenheimer Liouville–von Neumann Dynamics. Evolution of a Subsystem Controlled by Linear and Population-Driven Decay of Mixing with Decoherent and Coherent Switching," C. Zhu, A. W. Jasper, and D. G. Truhlar, *J. Chem. Theory Comp.* **1**, 527–540 (2005).
716. "Non-Born–Oppenheimer Molecular Dynamics," A. W. Jasper, S. Nangia, C. Zhu, and D. G. Truhlar, *Acc. Chem. Res.*, in press. (Special issue on Comp. Theor. Chem.)
723. "A New Algorithm for Efficient Direct Dynamics Calculations of Large-Curvature Tunneling and Its Application to Radical Reactions with 9–15 Atoms," A. Fernández-Ramos and D. G. Truhlar, *J. Chem. Theory Comput.* **1**, 1063–1078 (2005).
724. "Electronic Decoherence Time for Non-Born–Oppenheimer Trajectories," A. W. Jasper and D. G. Truhlar, *J. Chem. Phys.* **123**, 64103/1–4 (2005).

726. "Nonperfect Synchronization of Reaction Center Rehybridization in the Transition State of the Hydride Transfer Catalyzed by Dihydrofolate Reductase," J. Pu, S. Ma, M. Garcia-Viloca, J. Gao, and D. G. Truhlar, *J. Am. Chem. Soc.* **127**, 14879–14886 (2005).

728. "Potential of Mean Force Calculation for the Proton and Hydride Transfer Reactions Catalyzed by Medium Chain Acyl-Coa Dehydrogenase: The Effect of Mutations on Enzyme Catalysis," S. Bhattacharyya, S. Ma, M. T. Stankovich, D. G. Truhlar, and J. Gao, *Biochemistry*, in press.

730. "Combined Valence Bond-Molecular Mechanics Potential Energy Surface and Direct Dynamics Study of Rate Constants and Kinetic Isotope Effects for the $H + C_2H_6$ Reaction," A. Chakraborty, Y. Zhao, H. Lin, and D. G. Truhlar, *J. Chem. Phys.*, in press.

731. "Can a Single-Reference Approach Provide a Balanced Description of Ground and Excited States? A Comparison of the Completely Renormalized Equation-of-Motion Coupled-Cluster Method with Multireference Quasidenerate Perturbation Theory near a Conical Intersection and along a Photodissociation Coordinate in Ammonia," S. Nangia, D. G. Truhlar, M. J. McGuire, and P. Piecuch, *J. Phys. Chem. A* **109**, 11647–11650 (2005).

Scattering and Energy Transfer

1. "Rearrangement Collisions: Effect of Core Terms, and Conservation of Particle Flux on Approximate Theories," D. G. Truhlar, D. C. Cartwright, and A. Kuppermann, *Phys. Rev.* **175**, 113–133 (1968).

4. "Differential and Integral Cross Sections for Excitation of the 2^1P State of Helium by Electron Impact," D. G. Truhlar, J. K. Rice, A. Kuppermann, S. Trajmar, and D. C. Cartwright, *Phys. Rev. A* **1**, 778–802 (1970).

6. "Electron Scattering by H_2 with and without Vibrational Excitation. I. Quantum Mechanical Theory," D. G. Truhlar and J. K. Rice, *J. Chem. Phys.* **52**, 4480–4501 (1970). Erratum: **55**, 2005 (1971).

7. "Electron Scattering by H_2 with and without Vibrational Excitation. II. Experimental and Theoretical Study of Elastic Scattering," S. Trajmar, D. G. Truhlar, and J. K. Rice, *J. Chem. Phys.* **52**, 4502–4515 (1970), **55**, 2004(E) (1971).

8. "Electron Scattering by H_2 with and without Vibrational Excitation. III. Experimental and Theoretical Study of Inelastic Scattering," S. Trajmar, D. G. Truhlar, J. K. Rice, and A. Kuppermann, *J. Chem. Phys.* **52**, 4516–4533 (1970).

14. "The Importance of Polarization for Electron Scattering in the Intermediate Energy Region," D. G. Truhlar, J. K. Rice, S. Trajmar, and D. C. Cartwright, *Chem. Phys. Lett.* **9**, 299–305 (1971).

16. "Forcing Conservation of Particle Flux in Perturbation Theory Calculations of Inelastic Scattering," D. G. Truhlar, *Phys. Rev. A* **4**, 1886–1891 (1971).

19. "Effect of Charge Polarization on Inelastic Scattering: Differential and Integral Cross Sections for Excitation of the 2^1S State of Helium by Electron Impact," J. K. Rice, D. G. Truhlar, D. C. Cartwright, and S. Trajmar, *Phys. Rev. A* **5**, 762–782 (1972).

24. "Applications of the Expansion Technique of Harris and Michels to Electron-Hydrogen Inelastic Scattering," R. L. Smith and D. G. Truhlar, *Phys. Lett. A* **39**, 35–37 (1972).

25. "Application of the Quasiminimum Principle to Calculations on Electron Scattering by Atomic Hydrogen," D. G. Truhlar and R. L. Smith, *Phys. Rev. A* **6**, 233–239 (1972).

26. "Convenient Determination of Resonance States in Atomic Collisions," D. G. Truhlar, *Chem. Phys. Lett.* **15**, 483–485 (1972).

27. "Electron Scattering by Molecules with and without Vibrational Excitation. IV. Elastic Scattering and Excitation of the First Vibrational Level of N_2 and CO at 20 eV," D. G. Truhlar, S. Trajmar, and W. Williams, *J. Chem. Phys.* **57**, 3250–3259 (1972).

28. "Electron Scattering by Molecules with and without Vibrational Excitation. V. Elastic Scattering and Nonresonant Vibrational Excitation of N_2 at 30–83 eV," D. G. Truhlar, *J. Chem. Phys.* **57**, 3260–3263 (1972).

29. "Ab Initio and Semiempirical Calculations of the Static Potential for Electron Scattering of the Nitrogen Molecule," D. G. Truhlar, F. A. Van-Catledge, and T. H. Dunning, *J. Chem. Phys.* **57**, 4788–4799 (1972), **69**, 2941(E) (1978).

30. "Test of Massey's Method for Calculating the Static Potential for Electron Scattering by N_2 ," D. G. Truhlar, *Chem. Phys. Lett.* **15**, 486–489 (1972).

34. "Electron Scattering by Molecules with and without Vibrational Excitation. VI. Elastic Scattering by CO at 6–80 eV," D. G. Truhlar, W. Williams, and S. Trajmar, *J. Chem. Phys.* **57**, 4307–4312 (1972).

35. "Program for Evaluation of Non-Exchange Type Integrals Required in Electron-Atom Scattering Theory Using Slater-Type Orbitals as Basis Functions," R. L. Smith and D. G. Truhlar, *Comput. Phys. Commun.* **5**, 80–87 (1973), **8**, 333–336(E) (1974).

38. "Vibrational Excitation in CO by Electron Impact in the Energy Range 10–90 eV," A. Chutjian, D. G. Truhlar, W. Williams, and S. Trajmar, *Phys. Rev. Lett.* **29**, 1580–1583 (1972), **33**, 1524(E) (1974).

39. "Program for Calculating Differential and Integral Cross Sections for Quantum Mechanical Scattering Problems from Reactance or Transition Matrices," M. A. Brandt, D. G. Truhlar, and R. L. Smith, *Comput. Phys. Commun.* **5**, 456–477 (1973). Erratum and addendum: **7**, 177 (1974).
